

Project Brief

5600 West, 2100 South to I-80

**2007 Legislative
Update**

Provided By:

Project Description: MAINTENANCE, Rotomill & Overlay, Chokepoint Project

This project will rotomill and overlay 5600 West from 2100 South to I-80 with a three-inch asphalt lift sealed with a one-inch pavement layer (open graded surface course). The resulting patch that will temporarily hold this rapidly deteriorating road together. Accelerated roadway deterioration in this area is due to the sharp increase in truck traffic following relocation of Union Pacific Railroad's main hub to this important arterial, which links I-80 to SR-201.

Anticipated Schedule:

This project has been submitted, and will advertise as money is reallocated by the Transportation Commission to cover project funding shortfalls. It is currently scheduled for construction in Summer 2007.

**Commission
Approved
Project Budget:
\$1,950,000**

**Anticipated
